

DIARY NOTES

FOIAb3b

DD/S

11 June 1956

25X1A9a

1. Approved of [REDACTED] taking leave from about 25 June to about 20 July.

25X1A9a

2. Met with [REDACTED] to discuss several points. Agree with him that we should move in the direction of having the Office of Logistics make the estimates of supplies to be procured for the operating components rather than having the operating components requisition by line items. I think that Jim also agrees with this, but a year ago I was not sure that he was ready to take this over.

25X1A9a

3. Discussed with Doug the necessity of his seeing pertinent information which should be considered in long term planning. Have spoken to both [REDACTED] and [REDACTED] about insuring that papers of this nature come to his attention.

25X1A9a

4. Attended a joint meeting of the Career Council and the GEHA Board at which time the Career Council clearly expressed their disagreement with the Board concerning hazardous duty coverage. The Council passed a resolution requesting the Board to accept for membership in GEHA those AQUATONE personnel who had been excluded, stating that if our actuarial experience made it necessary the Board could come back to the Council to request a re-examination of the problem.
